

## Construction-phase SWMPs

WWE has developed well over 100 stormwater management plans (SWMPs) and updates for clients with construction sites in Colorado and for out-of-state projects. WWE staff have also conducted and assisted with the development of third-party stormwater audits for a national homebuilder with sites throughout the U.S. The purpose of the audit program was to assess the extent of permit compliance and identify areas in need of correction. A similar program has been conducted for a major oil and gas company since 1997. Audits included field inspections, records reviews, close-out meetings and final reports.
