

Paul's Development East Water Rights

WWE has been working with Paul's Development East (PDE) in developing a groundwater supply for their residential developments near Strasburg, Colorado, since 1999. WWE has been involved in quantifying the Denver Basin groundwater underlying the property and assisting PDE in obtaining approval for the use of that water for its domestic and municipal water supply needs. WWE has been involved in permitting, construction and testing of four Arapahoe Formation wells currently serving several communities on PDE property.

WWE also assisted PDE in obtaining a replacement plan to use an alluvial water supply well as a high yield peaking supply. Replacement credits are provided by discharges from the regional wastewater treatment facility.
