

Sanderson Gulch Functional Assessment

WWE performed a functional assessment of wetlands for the Green Gables redevelopment project located near Wadsworth and Jewell on Sanderson Gulch in Jefferson County. The site is a golf course slated for redevelopment. WWE's evaluation found existing conditions (e.g., lack of native vegetation corridor, nutrient loading, etc.) were devaluing the onsite wetlands' function. This understanding guided WWE's conceptual re-design of the stream corridor, resulting in a wetland design that will confer enhanced aquatic resource function.
